Steins;Gate シュタインズ・ゲート 1

There is no end though there is a start in space. Infinity
It has own power, it ruins, and it goes through there is a start also in the star. Finite.
Only the person who was wisdom can read the most foolish one from the history.
The fish that lives in the sea doesn't know the world in the land. It also ruins and goes if they have wisdom.
It is funnier that man exceeds the speed of light than fish start living to the land.
It can be said that this is as final ultimatum from the god to the people who can fight.

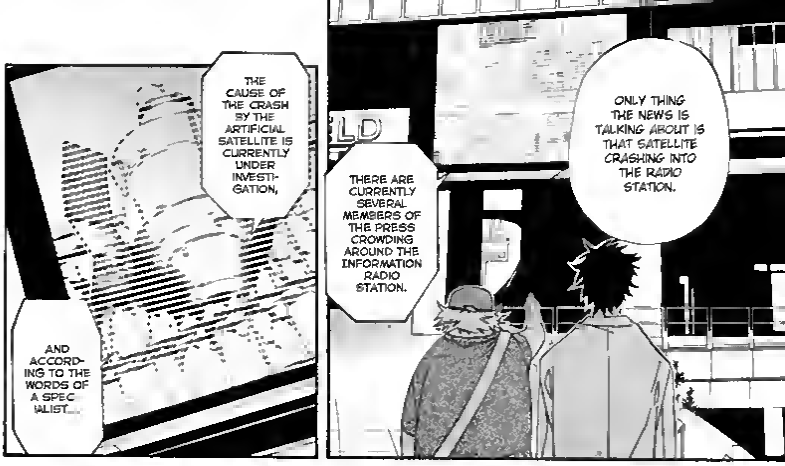
SO, I DID SEE THAT HORDE OF PEOPLE VANISH IN AN INSTANT RIGHT IN FRONT OF ME...!
NO MISTAKE ABOUT IT... THE STREETS IN AKIHABARA ARE ALWAYS BRIMMING WITH PEOPLE...
THAT STORY AGAIN...
YOU WERE JUST DAY-DREAMING...
LOOK OVER THERE...

CRAZY BORING RAISED TO THE 12TH POWER
WHY NOT JUST SKIP IT AND GO TO A MAID CAFÉ?



THE CAUSE OF THE CRASH BY THE ARTIFICIAL SATELLITE IS CURRENTLY UNDER INVESTIGATION,
AND ACCORDING TO THE WORDS OF A SPECIALIST...
THERE ARE CURRENTLY SEVERAL MEMBERS OF THE PRESS CROWDING AROUND THE INFORMATION RADIO STATION.
ONLY THING THE NEWS IS TALKING ABOUT IS THAT SATELLITE CRASHING INTO THE RADIO STATION.

NOTHING ON MAKISE KURISU
.....
I WONDER IF THEY'VE DISCLOSED WHETHER ANYONE DIED OR NOT
BUT EVEN STILL THAT'S A PRETTY BIG DISASTER

BY THE WAY, ABOUT THE PHONE STOVE...
WAS WHAT I SAW REALLY JUST A DAY-DREAM?

I STILL DON'T KNOW THE CAUSE FOR WHY THE KAA-RAGE* WAS FROZEN WHEN THE STOVE'S SUPPOSED TO THAW IT OUT
WHAT DO YOU THINK OKARIN?
A WITTY EXPLANATION!
ANYWAY, ABOUT THAT STOVE...
HMM? DO YOU HAPPEN TO BE REFERRING TO THE INVENTION WE MADE IN THE MIXED-RESIDENTIAL BUILDING OF AKIHABARA IN THE INVENTION CIRCLE WE FOUNDED CALLED, THE "ROOM FOR FUTURE GADGETS RESEARCH"?

原作・コミック版ともに堂々スタート！紅莉栖役・今井麻美さん、コミック版をアツく語る！！

――コミック版「シュタインズ・ゲート」の第一印象は？

「オカリンがよくも悪くも特徴的な人なので、それを絵で描くっていうのは難しいのかなって思っていたんですが、美情も豊かで、私が想像していたオカリン像にかなり近いです。ちょっとかっこよすぎじゃないって思いましたけど（笑）。まゆしいの髪ふりさも見事に表現されてますし、クリスがまたえろい美人で、おっ、かわいいとか思っちゃいました。自分が演じているにも関わらず（笑）」

――ゲームとは違うメディアとしてのコミック版に期待するのはどんなことですか？

「複数のキャラクターが出てくる場面でのバランス感覚というのがゲームと一番違うところだと思うんです。ゲームはキャラクターなどの軸に沿ってひとつのものに特化していくマンガは世界全体を描いていくっていう意味では、この世界を知る良いきっかけになるのではないかと思います」

――「アライブ」読者へのメッセージをお願いします。

「このマンガを読んで面白いなと思ってくださった方に応援していただいたら、これから先の展開もひょっとしたら望めるかな、なんて思っています。私実は「にゃんこい」というアニメのエンディングも歌わせていただいておりまして、アニメ化なんてことになれば、キャラソンを作っていただける事もあるんじゃないかと期待しています（笑）。これからも『シュタインズ・ゲート』のマンガを読み続けてほしいなと思います。よろしくお願いします」

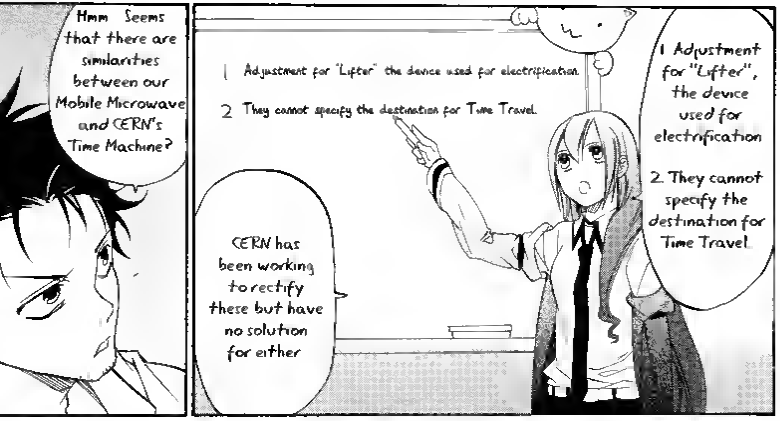
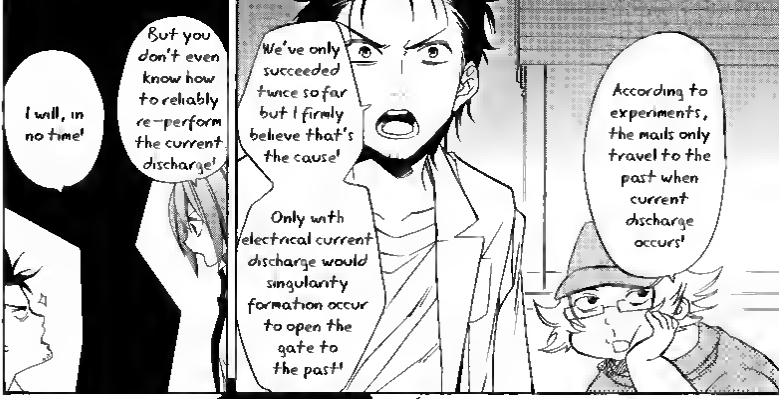
Christina, you're in charge of CERN's fact-finding... find any new significant info?
About this,
CERN had two unresolved problems regarding time travel

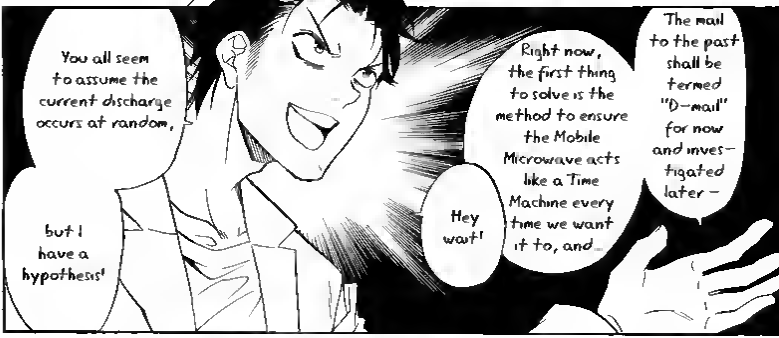


Hmm Seems that there are similarities between our Mobile Microwave and CERN's Time Machine?
1 Adjustment for "Lifter" the device used for electrification
2 They cannot specify the destination for Time Travel.
1 Adjustment for "Lifter", the device used for electrification
2. They cannot specify the destination for Time Travel
CERN has been working to rectify these but have no solution for either

There are so many unknowns with the Mobile Microwave -
Unlike LHC, it wasn't made for Time Travel. Same is the reason and method to replicate the electrical current discharge...
It may be true
Really... So our Mobile Microwave's a form of mini LHC!?
Well, people nicknamed LHC as "The world's largest Microwave"!



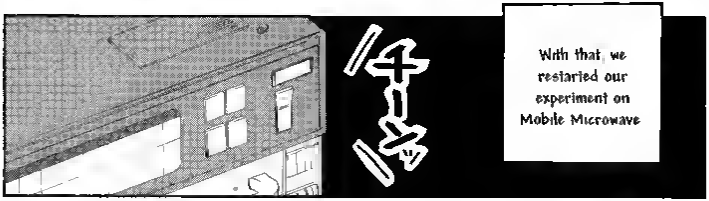
According to experiments, the mails only travel to the past when current discharge occurs!
We've only succeeded twice so far but I firmly believe that's the cause!
Only with electrical current discharge would singularity formation occur to open the gate to the past!
But you don't even know how to reliably re-perform the current discharge!
I will, in no time!



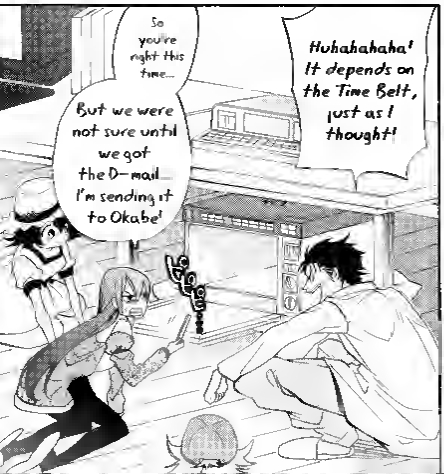
The mail to the past shall be termed "D-mail" for now and investigated later -
Right now, the first thing to solve is the method to ensure the Mobile Microwave acts like a Time Machine every time we want it to, and...
Hey wait!
You all seem to assume the current discharge occurs at random,
but I have a hypothesis!

Looking back at the only 2 times where that occurred...
The first D-mail I sent to Dar by chance happened sometime between 12pm to 1pm.
The second one... The one all four of us witnessed - happened around 18:00 in the evening.

we may be able to replicate that phenomenon!
Which means We may be able to replicate our experiment at a similar time belt.

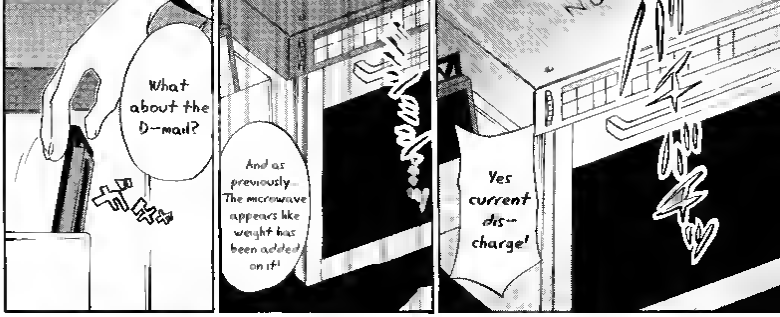


With that, we restarted our experiment on Mobile Microwave



So you're right this time...
But we were not sure until we got the D-mail... I'm sending it to Okabe!
Hahahahaha! It depends on the Time Belt, just as I thought!

Ah...
Oh-!
Jellified banana!



What about the D-mail?
And as previously The microwave appears like weight has been added on it!
Yes current dis-- charge!

I've got 2 messages and they're both from 5 days ago!
Two? I sent one!?

Anyways, keep on sending!
What significance can that hold?
Right... time gap for other occasions was 5 days too.
And I wondered why I got the mail of 5 days ago!
What can be the reason...
Talking of which, the mail I've gotten from you was broken into 2 separate mails too!

Here!
-Electrical current discharge occurs only when special conditions are met? (Around 12pm - 6pm)
-Word limit of D-mail (half-but 12 words or full but 6 words) X 3 (Words exceeding this limit disappear)
-By employing the timer function of the Mobile Microwave with integer numbers time travel occurs. Timer 1 second = 1 hour real time
-At the same time, objects inside the Mobile Microwave will be jellified. (Teleportation occurs at same time.)
どんっ
Here're a few attributes of D-mail we observed!
2nd August 2010 will be a day forever remembered by mankind!
Because...
I have to make this important declaration right here!
We'll verify the details tomorrow.
We still have various unknowns but we've perfected the basic working of D-mail!
Anything to add -on?

This day, is the date where we, the Future Gadget Lab, invented the
Time Machine!!
ハァーッ
Sailing out to the uncharted oceans of time travel!!
...First in History? Didn't CERN succeed in time travel first?
Anyway, we didn't invent the Time Machine — we chanced upon that attribute!
Damn!! Show respect to the proud declaration I just made!!
Enough!! I conclude the 66th roundtable meeting for today!! Dismiss!!!
To be continued!!

Nice to meet you!
Firstly, let's welcome our new Lab member 005 Kiryuu Moeka, known as the Shining Finger! I hope you enjoy your time here!

Practical uses-?
Our experiment will enter the second phase today, exploring practical uses of our D-Mail!
To our main discussion today, ladies and gentlemen -

I'm thinking
If we can change the past...!
Hey--? But Okarin won't be able to read my diary!
What's that! Write your unimportant messages into your diary all you want!
I shall send you messages of "Good morning Okarin!" so that it reaches you early in the morning!
Yes that's my intention!
Is that an excuse to changing the past?
Besides, how can you trust a single musing made by some suspicious, self-proclaimed time traveler!
Can you prove otherwise?
Titor mentioned that -
the world will form another parallel plane!
Wait, this is dangerous!
We aren't even sure what happens if we invoke a Time Paradox!? What will you do if you turn our world into a singularity by that!?
Good question Mayuri!
Mayu-shi doesn't really get it,
but what from the past do you want to change, and how?
Okarin, Okarin!

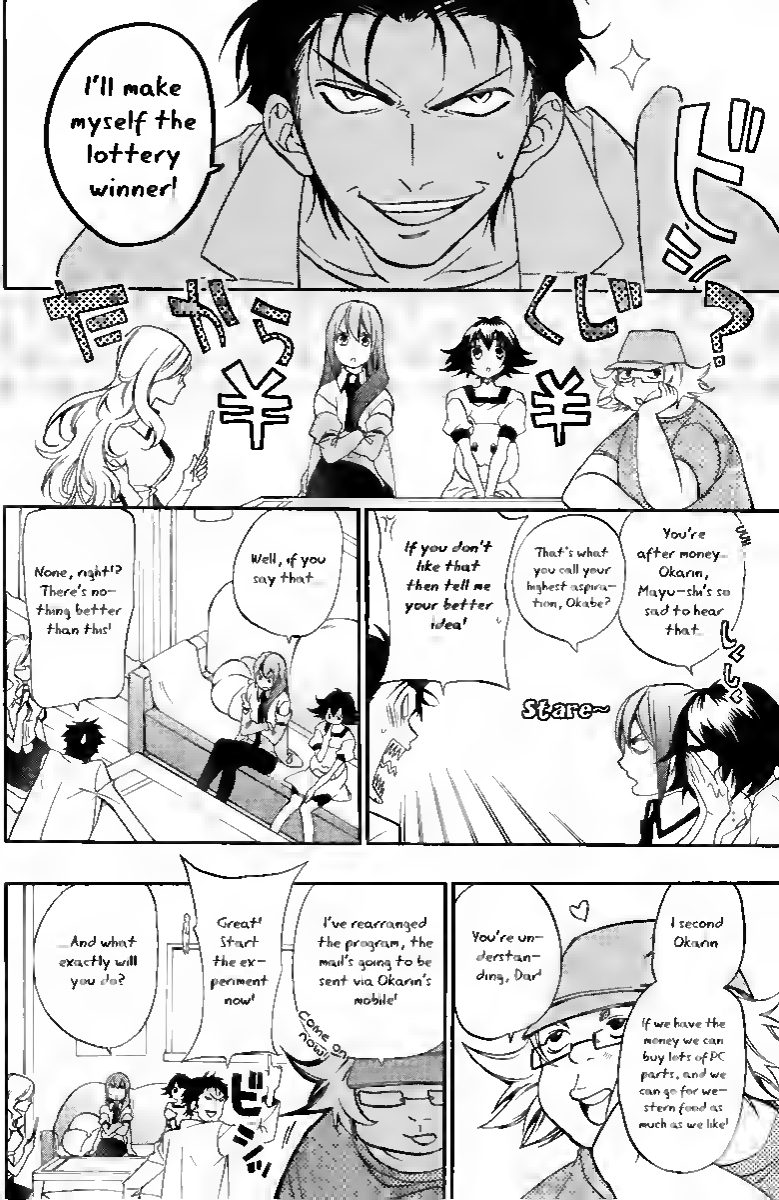
...This...



I'll make myself the lottery winner!

You're after money... Okarin, Mayu-shi's so sad to hear that...
That's what you call your highest aspiration, Okabe?
If you don't like that then tell me your better idea!
Stare~
Well, if you say that...
None, right!? There's nothing better than this!
You're understanding, Dad!
I second Okarin
If we have the money we can buy lots of PC parts, and we can go for western food as much as we like!
I've rearranged the program, the mail's going to be sent via Okarin's mobile!
Great! Start the experiment now!
...And what exactly will you do?
Come on, now!
ビシッ

We'll start by looking for the results from the latest lottery!
Ah, if we're talking about Lotto 6 the results are published every week
I'll google it
And we're sending the lucky numbers back to the past?
Right!
Let's see, the Top price of Lotto last week...
Wow... There's 200 million!?
What... 2... Two hundred million!?
Wait, don't! Not the First Price, it'll only attract media attention!
HUH?
Don't you understand!? The "Authorities" are after me!
If I got the top price and the media comes looking for me, the authorities will identify me under my cover in no time!
No they wont
I think perhaps we should try another way and aim for the third prize...
Hey, that's just for 700 thousand
Okabe's chicken!
It's enough to get a truckload of bananas for our experiments!

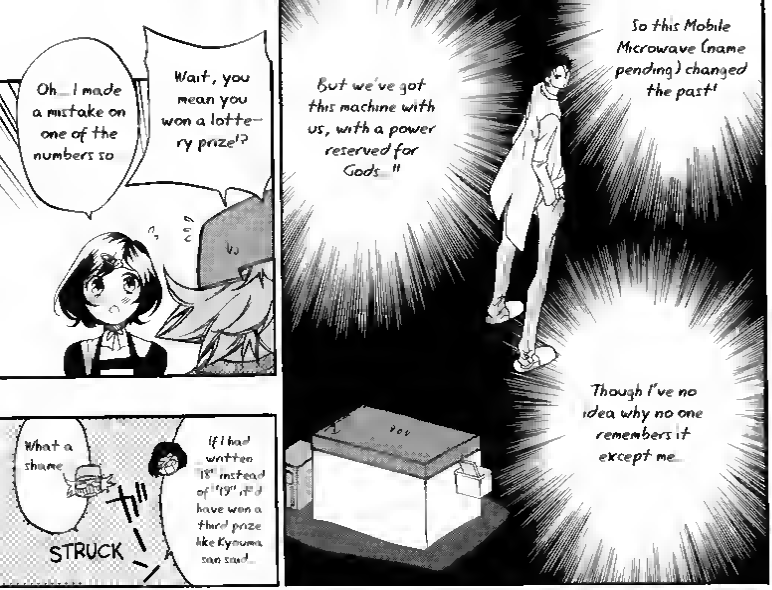
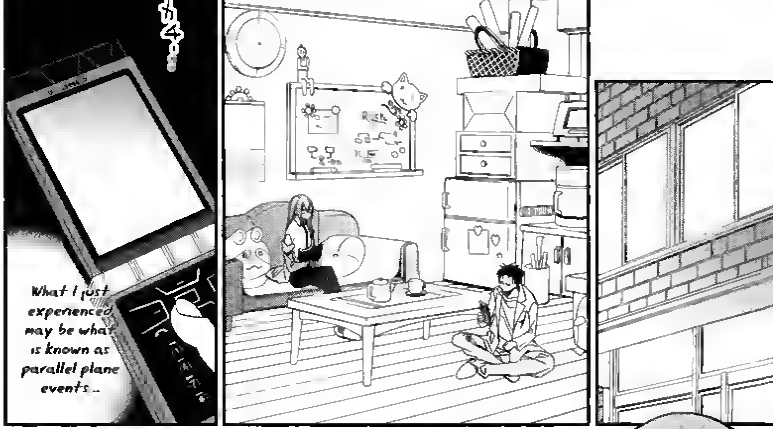
Kyouma-san - I need to apologize for this...
Rukako... What brought you here?
My past self is an idiot!!!
One week before...
Eh?!... You've told me to buy this numbers because they're coming out...
This... you...! Rukako, where did you get the Lotto 6 numbers from!?
Re... really!? When was that!
SHOCK
All of us agreed on this after the discussion!
Saw me sending the D-Mail with the Third Prize information!
And the past changed!
Why are you asking me! You saw it too!
Saw what!?
Okabe... Don't tell me you've sent lottery numbers around with the Mobile Microwave!

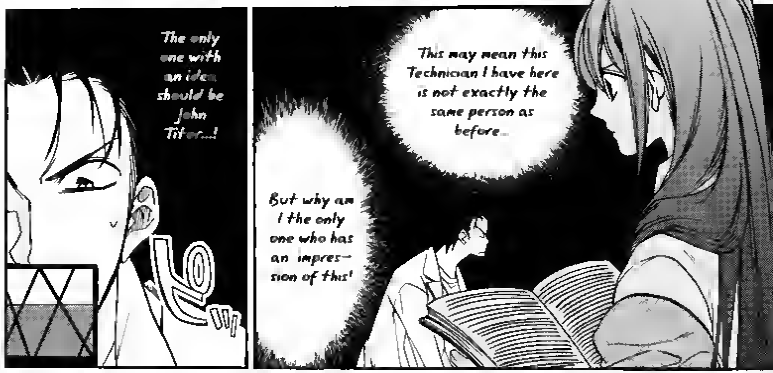


So this Mobile Microwave (name pending) changed the past!
But we've got this machine with us, with a power reserved for Gods...!!
Though I've no idea why no one remembers it except me...
Wait, you mean you won a lottery prize!?
Oh... I made a mistake on one of the numbers so
What a shame
If I had written "8" instead of "9", I'd have won a third prize like Kyouma-san said...
STRUCK

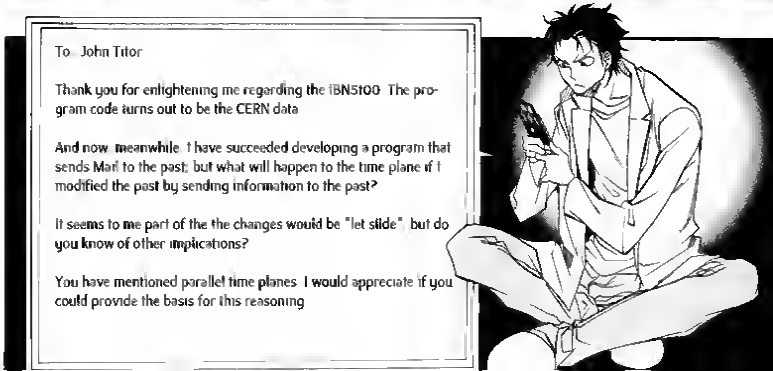
Okabe you're saying strange things. What did just happen?
...I'll tell all of you everything I know later...
please, everybody just dismiss today!



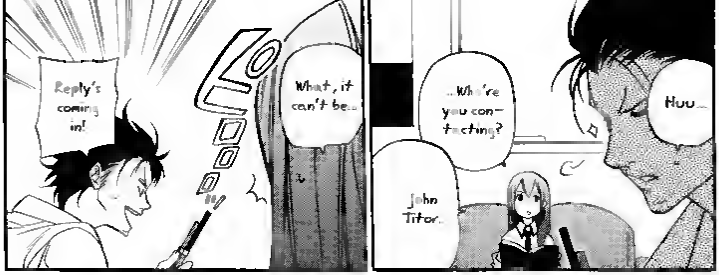
What I just experienced may be what is known as parallel plane events...



The only one with an idea should be John Titor...!
But why am I the only one who has an impression of this!
This may mean this Technician I have here is not exactly the same person as before...



To: John Titor
Thank you for enlightening me regarding the IBN5100. The program code turns out to be the CERN data.
And now, meanwhile, I have succeeded developing a program that sends Mail to the past; but what will happen to the time plane if I modified the past by sending information to the past?
It seems to me part of the the changes would be "let slide", but do you know of other implications?
You have mentioned parallel time planes. I would appreciate if you could provide the basis for this reasoning.



Subject Deeply interested
From John Titor
3 August 16 27

I am extremely interested in your findings Judging from the observations given I think you have succeeded in changing the past

By sending a mail to the past you have created a minute Divergence Bravo!

You can imagine it as the moment you send that mail you have moved the world you resided in to another world on a plane where everything else stays the same but for some minute attributes.

The new time plane you have moved to is founded on basis where you told a friend who'll buy a Lotto one digit wrong after you received information from the future

The only mystery is that "you possess the memories from the previous plane" is that what has happened?

Subject Re Deeply interested
From Hououin Kyouma
3 August 16:31

I possess the memories from the previous time plane before the change That is a fact By the way this is the second time I come to experience this phenomenon

Did you have similar experiences since you traveled 26 years back here?

What consequence will this changing the time plane according to a personal will have?

Subject Memory
From John Titor
3 August 16:39

Traveling back to the past via mail to change past events is something people at year 2036 have not discussed upon
Thus, I have no way of explaining what phenomenon you have just experienced

The Time Machine was completed in 2034 sparkling fierce debate the next two years regarding application to our world What has been discovered at the end is the so called "Attractor Field"

There is not much meaning in changing the parallel plane by making small adjustments to it a small differences will be nullified by convergence.

And people who can observe the convergence rarely exists

I have never met someone who has the ability, and may have my judgment impaired but I think there may be a possibility that you Kyouma may be a one of the rare people who possess the ability to observe a convergence

If you truely hold this talent you may have the power to change the world
Towards a 1% divergence. Towards approachers to the world known as "Attractor Field"

I don't know about the details, but if we consider the cause and effect, there's nothing unnatural about that...

I can't verify, but...
Can this be possible?
Because of the D-Mail she sent to herself, all her actions until today have changed, and the reconstructed outcome was that "She never came to this Lab"...
From what you said, only she was involved in the whole mail process, right
There's also a possiblity that her case is just a product of your imagination

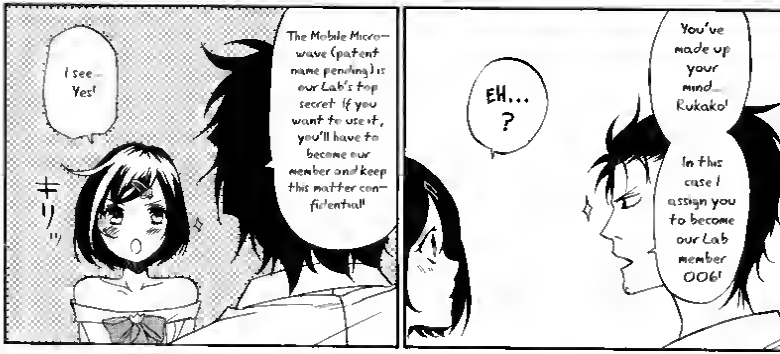
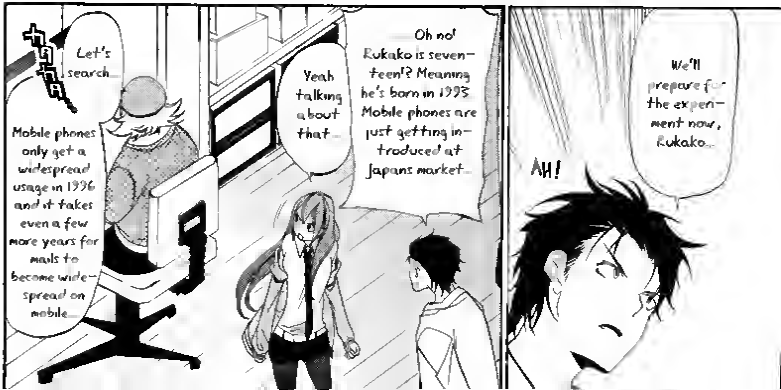
Well!
Going to sleep as a boy, but one day waking up as a girl!
I've always thought of something like that!
I've heard an urban legend! If you eat lots of meat in pregnancy you'll probably get a baby boy.
But if you have mostly vegetables you'll likely get a baby girl!
HEH~
.....
Christina, wouldn't you be interested in testing this legend?
You mean Sending a D-Mail far into the past when Urushibara's Mum was still expecting him?
This... Wait!
Right! Something like telling her to eat more vegetables!

You want to test out if I can become a girl right?
If that's possible I can bear the risk...!
I'll bear responsibility for myself.
Think about how all history in Rukashi's 17 years of life is going to be wiped clean and amended! Who's going to be responsible for her?
This...
And what are we going to do if we succeed?



I see... Yes!
The Mobile Microwave (patent name pending) is our Lab's top secret. If you want to use it, you'll have to become our member and keep this matter confidential!
EH...?
You've made up your mind... Rukako!
In this case I assign you to become our Lab member 006!



Let's search...
Mobile phones only get a widespread usage in 1996 and it takes even a few more years for mails to become widespread on mobile...
Yeah talking about that...
...Oh no! Rukako is seventeen!? Meaning he's born in 1993. Mobile phones are just getting introduced at Japans market...
We'll prepare for the experiment now, Rukako...
AH!

We'll try sending out to a pager!
If there's no Mobile,
I know this
How?
In that case, let's start now!
The Pager message format is Hiragana-na-only 16 letters!
Wah, that's wonderful news Ruka-kun!
We spent the latter part of the day explaining to Rukako how our Mobile phone system works
And he went home and confirmed with his Mum if she possessed a pocket pager back then
The next day,
That's too much like direct talking!
Let's modify it
Hem Shall we send something like this?
To Mum. Eat lots of vegetables.
My Mum had a pager!
You've a better suggestion with 16 Hiragana!?

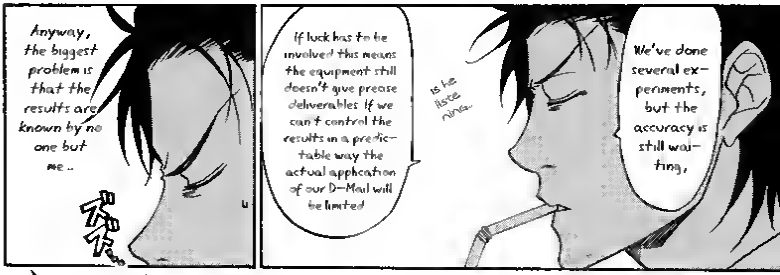
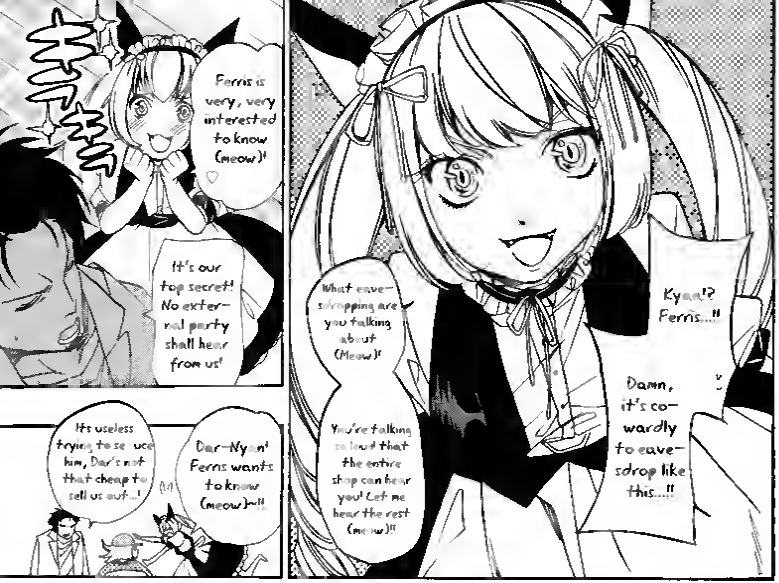
Failure?
What failure?
Why? Something's wrong with the Mobile Microwave?
No no-thing...
COUGH
"What!" we were experimenting with the Mobile Microwave
That's right... No one except me has recollection about the incident!
The result of sending the D-Mail was not up to what we expected.
There are still elements not under our control, we've to experiment further...

Dar,
what do you think about the D-Mail?
Welcome (meow) back!
Part amazing, part not so amazing
Thank you for waiting (meow)
Hey, Queen Nyan!



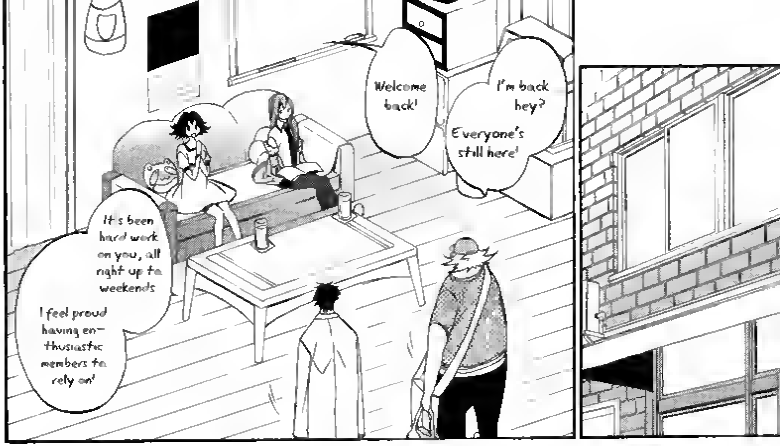
Anyway, the biggest problem is that the results are known by no one but me..
If luck has to be involved this means the equipment still doesn't give precise deliverables. If we can't control the results in a predictable way the actual application of our D-Mail will be limited
Is he like nine..
We've done several experiments, but the accuracy is still waiting,

Huha-haha-haha
This is what fate wants us to do!!
You're talking about Time Machines?
We could get our Mobile Microwave to send people
Think about how we could send people not only to the past but the future!
We'll try improving it.. no!! We've got to work on it!!

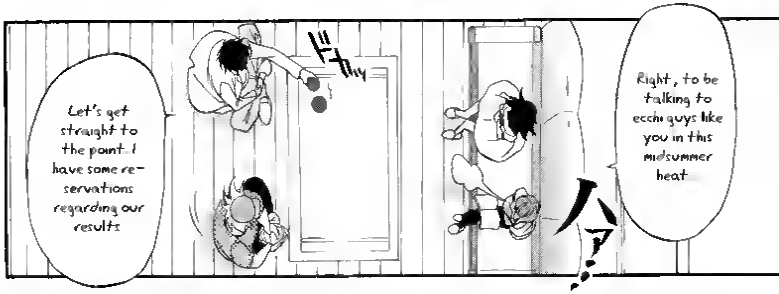


Kyun!? Ferris...!!
Damn, it's cowardly to eavesdrop like this...!!
What eavesdropping are you talking about (Meow)!
You're talking so loud that the entire ship can hear you! Let me hear the rest (meow)!!
Ferris is very, very interested to know (meow)!
It's our top secret! No external party shall hear from us!
Its useless trying to use him, Dar's not that cheap to tell us out...!
Dar-Nyan! Ferris wants to know (meow)~!!

Ferris wants to try (meow)~
Well, I have the authority and will consider letting you
Don't invite outsiders in on a whim!!
Really!? Promise (meow)!
He is really that cheap!!
Mainly me!
Well, we've just invented a machine that sends mail messages to the past!
MEOW!!
MEOW!!
Uh.... Another useless member coming in...!



Welcome back!
I'm back hey? Everyone's still here!
It's been hard work on you, all night up to weekends
I feel proud having enthusiastic members to rely on!



Let's get straight to the point. I have some reservations regarding our results
Right, to be talking to ecchi guys like you in this midsummer heat
Ha?!

Thus, today's discussion will be on performing time travel acts not on D-Mail, but by replicating CERN methods!
Don't be silly!
Well, there's no choice. If there's no way to strictly control all affected parties, then results vary according to how they decide to react!
The uncontrollable factors surrounding D-Mail are numerous, so results cannot be replicated reliably

Why must you insist it's impossible, when I'm the one who invented the first mailing program to the past!
Right now we don't know how to use Lifters...
Hell, we don't even know what mechanisms are involved!
And if we can't specify the destination, we don't know where the subject will land!
And yet our D-Mail always reaches the receiver accurately!
How do you explain this!?
If you say that...
Because the email address is specified isn't it?
Is that so... I don't think mobile reception could have covered spans of milhont of kilometers across
If time travel specifications can be controlled like with D-Mail then time travel is possible!
By the way Dar, how's the CERN hacking progressing?
Just fine... I've a truck dump of information from there!
Jhnnn
In that case we'll decipher whatever information we obtained first
now that we know that the IBN5100 job!

You ha-ven't told us!?
What? When did you have that!
Why, I brought in the IBN5100 some time ago.
Haven't you tried out the functions yet?
Told you we can't do it!
……
ENDTY
None
How can that be!
Impossi-ble……!!

What has happened!?
The legendary retro PC housed in Yanabayashi Shrine as an offering!!
You all should know!?
Yanabayashi Shrine? Offering? What are you talking about!?
I've never heard that from you?
Is that your hallucination? Did a heat stroke get at you!?

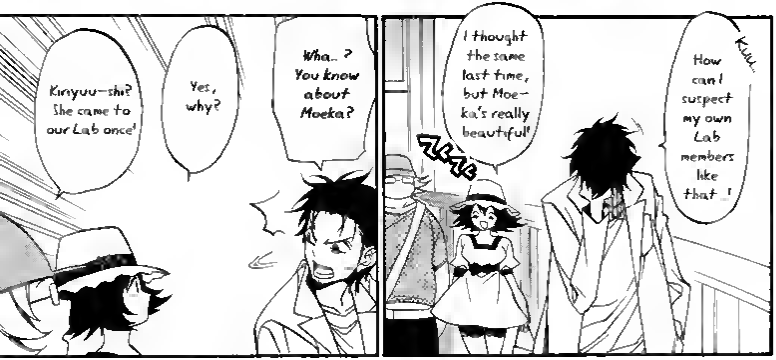
.....IBN5100 has been lost...!?
THUMP
Who possibly took that away? The Agency? CERN!?
No—Even if they managed to steal that, they couldn't possibly erase memories out of Dar—!!
THUMP
Don't tell me it's Moeka—?
Or John Titor!?
THUMP

We've received the first report of Dar's hacking on the 3rd of August
Which means the machine was in our Lab until the 3rd of August!!
It's also a fact that Yanabayashi Shrine used to house the IBN5100
In that case Rukako and Ferries should have a clue to what happened!
Rukako
090XXXXXXXX
Hello, Rukako?
I wish to hear from you about the IBN5100
通話中
I see
Sorry to call you at this hour
Rukako knows of its existence but the machine's not in his Shrine now
Mayun, I need to contact Ferris!
You know her number right? Tell me
Sure!
RRRR...
How will this turn out!!?

Meow~ To think Ferries gets a call from Kyouma (meow)~
There's something I need to hear from you badly
Regarding IBN5100!
It's me Hououin Kyouma!
Hi this is Ferris here (meow)
...Let's hear...
...Huu, meow! I can tell you about that, but I've a condition (meow)
Then,
come to my house immediately (meow)!
...Got it.

And
Why are you all coming!
Mayushi has never gone to Ferris-chan's house before!
Besides it's Ferris-chan's private living place you're talking about... who wouldn't be interested in that!
Ah, you
Hmm?
TYPING TYPING TYPING TYPING
Kii... Ki-nyuu Moeka!!
You... Are you the one who's taken the IBN5100 away!?
You found IBN5100 ?
I found it and lost it!!
?
Oka-be-kun ?

I see, sorry about that Shining Finger
?
You really have no idea ?



Kiryuu-shi? She came to our Lab once!
Yes, why?
Wha.. ? You know about Moeka?
I thought the same last time, but Moe-ka's really beautiful!
How can I suspect my own Lab members like that !

What has that D-Mail done! And how.....
What does that mean? Just ye-sterday, ever-yone including Kurisu behaved like they didn't know about her existence...!
After Rukako sent that D-Mail, more conflicting recollections arose betwe-en me and everyone else.
We're here!

Dear Mistress, Hououin Kyouma-sama and his friends have arrived
A real Chamberlain!
Ferris, who on Earth...
Who on Earth are you!?
Kyouma... You arrived at a good time (meow)!

CHAPTER 06
INCREDIBLE HOMEOSTASIS II

WHO ON EARTH ARE YOU!?
Ferris...
Ferris is Ferris, what's wrong (meow)!
YOU'RE DODGING MY QUESTION! I'M LEAVING UNLESS YOU CLEAR THIS UP!
Don't, don't act all high and mighty! You want something from her right...?
SIGH...
In that case (meow)
The land around here belongs to our family (meow)
Huh?

Your family land...?
Really, so that's why your surname is "Akiba"!
Don't tell me you're from the inter-generational landlord family of the Akihabara district!
I already said that (meow)!
Ferris has a say in contribution to the Akihabara development too (meow)!
The Moe culture in Akihabara was promoted to the Board and encouraged by me too (meow)!
K-Books
But keep this confidential okay (meow)?
.....?
Wha...!?
FERRIS... WHAT A FRIGHTENING FIGURE!

Hu Hum!
Don't get cocky yet, Ferris Nyan Nyan!
Your intention to gain an advantage was obvious when you invited us to your mansion and told us about your celebrity status, unfortunately, it is useless
Because I'm the Mad Scientist
Hoooohh Kyouma!!
Embrace!
Hah-meow~ I admire people who have the strength to stick to their beliefs (meow)! ♪
She regained the advantage!
If anyone knows that I'm the Akiba family's successor, I can no longer be Ferris Nyan Nyan!
Please keep the identity of Ferris and Akiba Rumiko a secret (meow)!
No matter what happens, you are Ferris Nyan Nyan as long as you are willing to be!

Back to today's matters – where's the IBN5100?
I've no idea (meow)
What?
Nya-haha!
Thank you Okarin (meow)
But I can locate it on one condition!
Uh... I'll see where I can help
Yesterday, you talked about it in the May Queen, right (meow)?
Well you can
I wish to use your Time Machine (meow)!
but the capability is limited. It can only send back a message to someone's cellphone with a maximum of 18 words
That's still a great machine nonetheless!

The time machine and its information are our Lab's top secrets!
Can you join us as a member?
Mayu-shi wishes Ferris-chan to become our Lab member!
I second this!!
We'd be honored to have you!
What shall I do to join (meow)?
The only thing we require from new members is—
The promise of a blood fellowship...
and nothing else!
BLOOD... FELLOWSHIP...!!
GO
Following your oath, I shall assign you as the Lab member 007!
I trust you (meow)
I'll make the blood promise (meow)

Sorry Ferris...

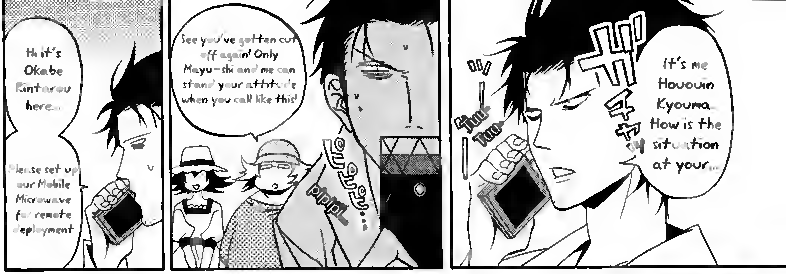
Um so, where's the Time Machine (meow)?



Hi it's Okabe Rintarou here...
Please set up your Mobile Microwave for remote deployment

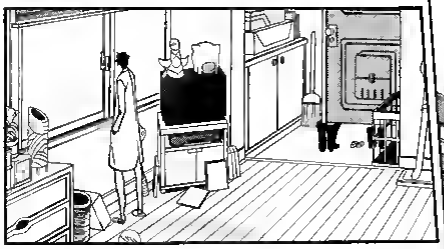
FERRIS'S DAD SEEMS LIKE A NICE MAN...
Mayu-shi's going back home now, but shall we go to Nakano on the way?
Yeah ?
Hey Kouga Yui you said? That's the same Character Designer for last season's Gundam! Buy a second copy for me too!
Hey you two – what are you talking about!
Sure!
Um, "Ai Sweet"'s doujinshi was out yesterday
Why do you want to go there?
And the artist this time's Kouga Yui san!
...Right here? Where?
Why don't you just buy your doujinshi right here!
SONY
KAORI
SHIMARU

SIMARU
Kaox
What?
Over there...
No, I mean right here! On the other side!
.....NO, THE ANIMATE DISAPPEARED...!
RUB RUB
Did I get it wrong...?
Like I said, Moe-related shops don't exist in Akiba!
What do you mean by none... It was still here yesterday!?
Of course there isn't any in Akiba - that's why I asked if we are going to Nakano
Everyone knows the Moe Mecca is in Nakano!
What gag are you trying to perform?
Where did the *Tora no Ana and Animate go!?

*Tora no Ana is a specialized Doujinshi shop. Animate is a chain that sells both Anime goods and commercialized Doujinshis.

Gamers? Ramdara!?
none here
The what's that!?
doujinshi-selling Akiba Kingdom?
What about Mandarake?
none
Melon Books? Asoba City?
The heat has gone to your head, Okarin
Akiba's THE Moe Mecca!
Yet again — distonance between what others know and I know of... The same reactions as always...!
This... is getting further from reality...
Ramen Santarou
it's not here
Wawah Wat Okann!

The Moe shops and the Maid Cafes have been clearly wiped from all Akiba streets!
What happened Okarin!?
Mayun, where's the May Queen you part-time in?
May Queen, what's that - Potato?
I said May Queen Nyan-Nyan!!
Doesn't Akiba have any Maid Cafes?
Ofcourse not the Akiba people have prejudices against the Moe business, they won't ever set up those here!
And... what's that again!
Butterfly effect...
Most likely the D-mail Ferris sent has something to do with this...
And within ten years that changed the whole course of history of Akiba drastically...



We changed the social history of the whole area... by our will.

Should I let it be?

What on Earth did Ferris sent in that message...

Despite of all changes, the relationships I had did not change... Does the Godess of fate fix it?
According to Mayuri, the May Queen never existed, and Ferris and I first met at the Rai Net AB tournament...
I've been reading Reiya san's photo doujinshi!
I admire her... I.. don't have such a figure...
By the way, Lab girls – it's Sunday of the Bon holidays, and yet you seem to be lazing around!
What have you been doing?
You know, flat chests' the moe trend right now!
So! Be confident even if you have no chest!
BUU!
To hear that from Mayushi... not convincing at all

How about we stay at the beach after the Comic Market?
Eh, everyone from our Lab?
I'll pass this time – I have to return to the States soon
Yeah right! I can see you wasting time reading and idling in the lab!
Cackle Cackle– Cackle
In that case I'll be frank
I'm not going to the beach in swimsuit with two Hentais!
I'll gladly join if it's an all girls' trip!
Hu... In that case you should be really frank!
"I've a huge birthmark at my bottom that I don't want any guy to see"...
GAH !!!
I have no birthmark!!

Like I told you before — Rukako's a boy!
Besides, if you make it an all girls trip Rukako can't go!
What do you mean?
Something's wrong with their reaction!
Wait...?
Okarin, it's not nice...
to say something like that...
.....
eh.....

Is Rukako crying? But he never cries about things like that...
Christina. I know you don't want me to say it,
but Rukako is a lovely, beautiful boy!
Okabe!!
Don't think we'll forgive you for your stupid jokes!
You're an unforgivable jerk!
You remind me of the jerks that pour salt onto others wounds!

I know... that he thinks of me as a boy...
I was just telling the truth
It's okay
No, well...
Huh? Why are they so... before...

To grope a 17-year-old girl like that... I hope I haven't given her post-traumatic stress disorder....
Uh...
Whimper
I've done something horrible to Rukako...
And...
Now I'm scared. I never imagined a Rukako without "jewels".

Rukuka was a boy who always wished to become a girl and sent her wishes through D-Mail...
and succeeded in the end!
A D-Mail has changed the past
And why do you think that Urushibara-san is a boy in the first place!?
I've explained it to you already!
I observed the moment of change in the World Line
and I will not differ my point
I intend to continue using these eyes...
You should believe in the Reading Steiner too...!
Once you calm down, talk to me!

I would understand if Rukako expels her anger on me, but why am I being punished by my own assistant...
Is she trying to overthrow me?
To kneel like that for 30 minutes... my legs are numb!
I've got mail...
I got kicked out of my Lab, where shall I go...
from xxx@xxxxx

You guys have an old man's taste.. And you call yourselves teenagers?
Wow, they package that with cute anime characters!
Man, our society's going bonkers!
But let's try this takuan for a change!
CRUNCH CRUNCH
Do you have to get that excited over a game?
Ah Really, it's Friday today!
I'm Back!
YES YES YES -!!
The Friday showdown time!
Well, it's Friday
What's up about Friday?
The release day of games, of course!
No one else beside you cares!

DONT TOUT YOUR PORNY STUFF IN FRONT OF GIRLS!!
Hihaha
Of course, what's wrong?
Are you for real!? Don't tell me you're playing these in our Lab!
And today's a packed release day! Damnit, they made me fork out money for more than 10 titles!!
No, I forked out for the titles myself!

I'm on the verge of getting abandoned by my parents, and the Lab's the only place where I shine,
They prepared dinner without my share, and we don't even talk!
I am still living with my parents, but they...
seem to hate having a yucky Otaku in their place!
Dad
More than a hangout...

Shall I call this place... my place of belonging?
I see. You want to say, you have a reason for playing those porny games here...
YOU LOSER!!
KAH
Uh, I feel like crying...
This is a touching revelation from you...
CRUNCH
Ho Hoy
Sniffle
Excellent, exactly what I was thinking!
Just say you don't want to get caught by your parents playing that!
What did you say?
This can't go on... I've got to do something about him!!
And what's that?
Em, nothing
But, don't Mayu-shi and Urushibara-san think that's perverted sexual harrassement as well? Right?

*The lines Kurisu said when she was scribbling at in "Death Nemo" (Death Note Parody) was exactly the same as the line from Yagami Light

You've got it wrong, Technician!
Rukako's a boy!
Ah, yeah...
...Um, wait?
So if I make Ruka-chi play my games then that wouldn't count as...
Yup, there's nothing wrong with showing boys the "real stuff"
